

Invitation to participate in research study

Join the conversation about simulation in Australian Intensive Care Units (ICUs)

The aim of this research is to understand how ICU simulation is planned and run, who is involved in facilitating and participating in simulation, and how people experience these activities in their workplace.

Are you eligible?

- Currently work in an Australian ICU, AND
- Have been involved in ICU-based workplace simulation in the past 12 months as either:
 - a simulation facilitator, or
 - a simulation participant

Study requirements

- If you choose to take part, you will be asked to complete a single online survey.
- The survey includes questions about
 - Your professional role and ICU work context
 - Your experiences with ICU simulation
 - Your views on simulation training, support, and outcomes
- The survey will take approximately 10–15 minutes to complete.

Participant benefits

- Help improve understanding of ICU simulation in Australia, informing future education and training practices.
- Will I receive anything for taking part?
Participants may choose to enter a prize draw for a \$30 gift card after completing the survey. Entry into the prize draw is optional and separate from the survey responses.
